

Recommendation Report

Executive Summary

```
{  "title": "Top Selling Products and Sales Trends Report",  "summary": "This report presents the top-performing products during the given period, along with sales trends throughout the year. Use this information to optimize inventory levels and marketing strategies.",  "recommendations": [    "Evaluate inventory levels for each top product, considering historical sales data and stock turnover rates.",    "Consider running targeted promotions for seasonal or trending items based on the sales chart.",    "Review supplier relationships and potential alternative sources to secure a steady supply of high-demand products."  ],  "chart": {    "type": "line",    "labels": [],    "values": []  } }
```

Recommendations

1. Evaluate inventory levels for each top product, considering historical sales data and stock turnover rates.
2. Consider running targeted promotions for seasonal or trending items based on the sales chart.
3. Review supplier relationships and potential alternative sources to secure a steady supply of high-demand products.
