Recommendation Report

Executive Summary

{   "title": "Inventory Analysis for Organization [ORG_NAME]",   "summary": "This report provides an analysis of the top selling products and sales trends for [ORG_NAME] during the given period.",   "recommendations": ["Consider increasing stock levels of products with high sales velocity to prevent stockouts.",   "Analyze slow moving inventory and consider markdowns or discontinuation if demand is not forecasted to recover.",   "Explore opportunities in new product categories based on seasonal trends."   ],   "chart": {   "type": "bar",   "labels": [],   "values": []   } }

Recommendations

1. Consider increasing stock levels of products with high sales velocity to prevent stockouts.

2. Analyze slow moving inventory and consider markdowns or discontinuation if demand is not forecasted to recover.

3. Explore opportunities in new product categories based on seasonal trends.
